

## Current Good Manufacturing Practices/Food Plant Sanitation

For many years the first edition of Current Good Manufacturing Practices/Food Plant Sanitation has been a standard guide and reference for the food processing industry. This second edition systematically covers all aspects of sanitation in all types of food plants. It provides food plant managers with the practical, basic information they need for planning, management and procedures. The text is supplemented with numerous illustrations, checklists, and sample forms. Application of the valuable information in this new edition will help food processing managers avoid regulatory problems and produce food products that achieve marketplace acceptance.
