

Green Political Thought

Andrew Dobson's highly acclaimed introduction to green political thought is now available in a new edition. It has been fully revised and updated to take into account the areas that have grown in importance since the last edition was published. The third edition includes: a comparison of ecogism with other principal modern ideologies, such as liberalism, conservatism, fascism, socialism, feminism and anarchism; an assessment of the relationship between green thinking and democracy, justice and citizenship; an exploration of sustainable development addressing the fundamental question of what to sustain; real environmental problems and how green thinking relates to them.
