

Racial Crossings: Race, Intermarriage, and the Victorian British Empire (Oxford Historical Monographs)

The Victorians were fascinated with intersections between different races. Whether in sexual or domestic partnerships, in interracial children, racially diverse communities or societies, these racial crossings were a lasting Victorian concern. But in an era of imperial expansion, when slavery was abolished, colonial wars were fought, and Britain itself was reformed, these concerns were more than academic. In both the British empire and imperial Britain, racial crossings shaped what people thought about race, the future, the past, and the conduct and possibilities of empire. Victorian fears of miscegenation and degeneration are well known; this study turns to apparently opposite ideas where racial crossing was seen as a means of improvement, a way of creating new societies, or a mode for furthering the rule of law and the kingdom of Heaven. Salesa explores how and why the preoccupation with racial crossings came to be so important, so varied, and so widely shared through the writings and experiences of a raft of participants: from Victorian politicians and writers, to philanthropists and scientists, to those at the razors edge of empire - from soldiers, missionaries, and settlers, to natives, half-castes and other colonized people. Anchored in the striking history of colonial New Zealand, where the colonial policy of racial amalgamation sought to incorporate and intermarry settlers and New Zealand Māori, *Racial Crossings* examines colonial encounters, working closely with indigenous ideas and experiences, to put Victorian racial practice and thought into sharp, critical, relief.
