

## Landscapes Beyond Land: Routes, Aesthetics, Narratives (EASA Series)

Land is embedded in a multitude of material and cultural contexts, through which the human experience of landscape emerges. Ethnographers, with their participative methodologies, long-term co-residence, and concern with the quotidian aspects of the places where they work, are well positioned to describe landscapes in this fullest of senses. The contributors explore how landscapes become known primarily through movement and journeying rather than stasis. Working across four continents, they explain how landscapes are constituted and recollected in the stories people tell of their journeys through them, and how, in turn, these stories are embedded in landscaped forms.
