

Nuclear Weapons, Justice and the Law

It is often argued that the nuclear non-proliferation order divides the world into nuclear-weapon-haves and have-nots creating a nuclear apartheid. Employing a careful and nuanced discussion of this claim, Elli Louka examines the architecture of the nuclear non-proliferation order, the fairness and effectiveness of international and regional institutions and scenarios for the future of nuclear weapons. A sophisticated study of a complex issue, this book is a must-read for policymakers and those who wish to understand the intricacies and challenges of developing institutions to address the nuclear weapons threat.
