

## The Foundation of Humes Philosophy (Avebury Series in Philosophy)

This study seeks to determine the coherence of Humes philosophical system and to locate its foundation. In this process the author attempts to show that this foundation is nothing but his doctrine of belief, that principle which is believed to be the base of everything else in the philosophy of David Hume. The author tries to show how this principle could be the fundamental doctrine upon which all other theories that constitute his philosophy completely depend. In addition, the book tries to show how Reid managed to give only a superficial understanding of Humes philosophy, and how other philosophers (such as Father James McGlynn) have plainly misinterpreted Hume, thus giving us a superficial understanding of his position; whereas Norman Kemp Smith has initiated a more correct understanding of his system.
