

The Exiles: An Archival History of the World War II Japanese Road Camps in British Columbia and Ontario

This book contains extensive documentation of the history of the Japanese Canadian men who were exiled to road camps during the second world war. The facts are presented as a first hand account, of both internees, as well as government officials, through their letters and documents. The author draws attention to the heavily censored archival evidence found in the Public Archives of Canada and suggests that the official government record does not represent the entire truth. The reader is presented with a large body of material, that when read with the benefit of hindsight, leads closer to a true understanding of this historical event.
