

The Political Thought of Sun Yat-Sen: Development and Impact

The significance of Sun Yat-sen's political thought has rarely been appreciated though he is hailed as the Father of Modern China. This is the first extended treatment of the subject, which will be invaluable to sinologists and historians of political thought. Dr Wells first traces the development of Sun's revolutionary ideas from the nineteenth to the twentieth century. She then considers the impact of Sun's political thought on Chinese revolutionary leaders and on Third World countries, arguing that it has been considerable. This subject has never before been so widely explored.
