

Nature Myths and Stories (Classic Reprint)

Excerpt from Nature Myths and Stories This is a completely revised and enlarged edition of Nature Myths and Stories, first published in 1892. In it I have retold favorite myths so that children may read them and enjoy them for themselves, and I have added stories that may suggest to teachers the wealth of good material within reach, and encourage them to form the habit of going to the best original sources, such as folklore, mythology, the Bible, and great poetry for help in the construction and telling of stories. I believe that a teacher should put enough of her own impulse to create into her story writing or story telling to make it a delight to herself as well as to her children. There are real dangers in adapting myths to children, yet the difficulties add to a teachers satisfaction in the worth-while effort, and if she is sensitive to the emotional reactions of children, there is constant incentive to growth and improvement in the great art of telling stories which every teacher of little children should master as a first essential of her profession. The myths should be selected, first of all, as good literature. They should be stories which the children will love all their lives.
